FLUORIDE SURVEY

Fluoride helps teeth become stronger and more resistant to decay. Children who receive the right amount of fluoride from birth have 50 to 60 % fewer cavities. Even as adults, they will have improved dental health, because the benefits of fluoride are lifelong.

There are a variety of ways you can get the protection of fluoride. It is usually necessary to get fluoride from more than one source to ensure that you get the maximum possible benefits.

Please answer the following questions concerning your fluoride intake so that we can plan a personal fluoride program for your family.

Date _____

Parent's names _____

Child's name _____

Mailing address _____

- | | YES | NO |
|--|-------|-------|
| 1) Do you have town water at home?
